👤 About Me

Front-End and Mobile Developer with 6 years of experience building responsive web and cross-platform mobile apps using Flutter, React.js, Kotlin, and FlutterFlow. Skilled in integrating RESTful and GraphQL APIs, with a strong focus on clean UI/UX and performance optimization.

✚ Skills

- Flutter
- React JS
- Kotlin
- FlutterFlow
- Provider, Riverpod, Getx State Management
- RESTApis
- GraphQL
- Firebase

🎓 Education

BE in Electronics & Communication
Ekalavya Institute of Technology
Chamarajanagar, Karnataka
2014-2017

💼 Experience

Mobile application developer
Tekzen Systems
May 2024

- Redesigned mobile app UI in Kotlin (XML) to modernize UX and improve navigation; integrated DocuSign SDK with GraphQL for secure in-app signing (online/offline), including authentication, templates, and signature capture.
- Built a Kotlin-based Android widget for tasks, approvals, and invites using WorkManager for background updates and BroadcastReceiver for real-time refresh.
- Developed a full-featured LMS app in Flutter with Riverpod and MVVM architecture, using Dio for scalable API communication.

Flutter Developer
Sweken IT Solutions Pvt Ltd
July 2022 - March 2024

- Developed responsive mobile and web applications using Flutter and FlutterFlow by translating UI/UX wireframes in collaboration with design teams.
- Delivered secure, maintainable code with MVVM architecture and Provider for efficient state management; integrated RESTful APIs for real-time updates.
- Ensured version control with Git and maintained alignment with cross-functional teams to meet project goals and timelines.

Flutter Developer
Center For Excellence In Postal Technology
Nov 2020 - June 2022

- Designed responsive neuromorphic interfaces using Flutter-Neumorphic, implementing clear visual hierarchy, adaptive UI scaling and accessibility-complaint contrast levels throughout the app.
- Developed features like tracking, post office search, financial calculations & offline capabilities.

Android Application Developer
Entity Vibes
April 2018 - October 2020

- Built custom UI, Implemented RESTful APIs and third-party libraries(Volley) to enhance application functionality.
- Git Retrofit Volley Rest APIs Dart JAVA Firebase Mixpannel
